3671

DATE MAILED: 08/05/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/777,003	Applicant(s) HAHN ET AL.	
	Examiner Gary Hartmann	Art Unit 3671	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 June 2005.
 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-10 is/are pending in the application.
 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
 5) ☐ Claim(s) _____ is/are allowed.
 6) ☒ Claim(s) 1-10 is/are rejected.
 7) ☐ Claim(s) _____ is/are objected to.
 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
 10) ☒ The drawing(s) filed on 11 February 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) ☐ All b) ☐ Some * c) ☐ None of:
 1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
 * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hovestad (U.S. Patent 3,671,990).

Hovestad discloses a dock leveler including a movable deck (15) having a lip extension plate (26) movably coupled to the front end thereof. There are lower support beams (24) affixed to the deck (15). Whether the deck is comprised of a single plate or multiple plates is not disclosed; thereby leaving the decision to one skilled in the art. It is well known to use a plurality of plates coupled adjacent one another to form a deck. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used a plurality of plates coupled in the manner claimed in order to, for example, assemble the deck from inexpensive and easily transported pieces, for example.

The support beams meet the recitations regarding the connecting bar. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have positioned a beam at the joint in order to prevent deformation of the outer edges, as is common when joining adjacent load bearing plates.

Art Unit: 3671

Regarding claim 5, welding is a well known means of affixing plates. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have welded the plates of Hovestad in order to obtain a sturdy surface. Further, since the upper surface is subject to use, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have disposed the weld beads below the upper surface in order to minimize wear on the weld beads.

Regarding claims 6 and 7, note that because there are no limitations regarding what is and is not within the scope of the terms "visible" or "variable," these terms would inherently be met by placing adjacent plates together. In other words, a gap would not be so perfectly aligned in every manner that visible detection would be impossible.

Regarding claim 8, there appears to be a frictional pattern shown on the upper right and lower right corners in Figure 1. Additionally, it is well known to use frictional patterns in order to increase safety. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used frictional patterns on the right and left plates in order to maximize safety. Regarding the term "out of registry," again note that there are no limitations regarding the extent to which the pattern must be out of registry. Because perfect alignment (i.e., completely within registry) would be extremely time consuming, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have positioned the patterns out of registry in order to reduce installation time.

Art Unit: 3671

Response to Arguments

Applicant's arguments filed June 20, 2005 have been considered but are moot in view of the new ground(s) of rejection.

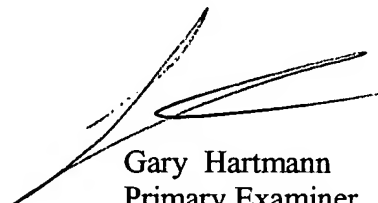

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary Hartmann whose telephone number is 571-272-6989. The examiner can normally be reached on Monday through Thursday, 9am-7pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Will can be reached on 571-272-6998. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
